

INDUSTRIAL CONTROL PANEL MANUFACTURING

AUTOMATED PANEL MODIFICATION

To maintain our leadership for quality, repeatability, and delivery we utilize an automated process for drilling, tapping, cutouts and panel modifications. We can modify various sizes and materials of back-panels or enclosures.

PANEL LAYOUT DESIGN

By combining the power of our panel layout design software and our extensive panel building knowledge we can design and prepare your panel layouts and enclosure modifications.

CONTROL PANEL MANUFACTURING

At RASP Inc. we build industrial controls panels for many different customers and are not limited to any one industry. We routinely assemble and wire control panels for the following industries: Machine Builders, Aggregate, Chemical, Food & Beverage, Molding & Injection, Energy, Medical, Packaging, Water & Waste Water, and many others.

MANUFACTURING CAPACITY

Three manufacturing bays allow us to accommodate various sizes and types of projects. Our 10,000 square foot bay allows for the bulk of our manufacturing. The first 3,500 square foot bay allows for testing, quality assurance and final preparation. Our second 3,500 square foot bay is used for production units along with a customer testing or commissioning area.
